

Introduction to Neurofeedback and Peripheral Biofeedback

Two Day Training Program - May 6-7th 2007

**Adventist Media Centre, Conference Room
150 Fox Valley Road, Wahroonga, Sydney**

Kerry Leahan PhD

Clinical Psychologist at the Canberra Hospital and The Canberra Psychology Clinic & Clinical Lecturer at The Australian National University.

Kerry has been using biofeedback and neurofeedback for several years, for a variety of medical disorders such as IBS, respiratory disease, and diabetes in addition to depression, anxiety, PTSD and chronic pain.

Marek Jantos MA

Director Behavioural Medicine Institute of Australia,
Lecturer School of Psychology, University of Adelaide

Marek has worked with biofeedback since the early 90's, specialising in chronic pain and anxiety disorders. He is a member and fellow of several professional associations and consults through a network of national clinics and has published medical articles on protocols using surface electromyography.

Course Description

The two day workshop will provide an introduction to neurofeedback and all the biofeedback modalities. This skills oriented workshop will explain the physiological basis for EEG, EMG, Skin Conductance, Temperature and Blood Volume Pulse and will demonstrate the use of each modality and introduce its common applications. As a result of this workshop participants will gain a good understanding of instrumentation, signal interpretation and their applications. Participants will find the mix of theory and practice conducive to learning skills they can take into their practice.

Course Cost - \$425.00 inc GST

Includes resource handbook, follow up support and meals

Neurofeedback and Peripheral Biofeedback

Sunday & Monday
May 6-7 2007
